**DETAILED ACTION**

***REOPENED (Appeal)***

Art Unit: 2164

1. In view of the Appeal Brief Request filed on 12/19/2007 PROSECUTION IS HEREBY REOPENED. A new grounds of rejection in Non-final set forth below. To avoid abandonment of the application, appellant must exercise one of the following two options:

(1) file a reply under 37 CFR 1.111 (if this Office action is non-final) or a reply under 37 CFR 1.113 (if this Office action is final); or, (2) initiate a new appeal by filing a notice of appeal under 37 CFR 41.31 followed by an appeal brief under 37 CFR 41.37. The previously paid notice of appeal fee and appeal brief fee can be applied to the new appeal. If, however, the appeal fees set forth in 37 CFR 41.20 have been increased since they were previously paid, then appellant must pay the difference between the increased fees and the amount previously paid.

A Supervisory Patent Examiner (SPE) has approved of reopening prosecution by signing below:

/Mohammad Ali/

Supervisory Patent Examiner, Art Unit 2169

***Response to Amendment***

2. In this Office Action, claims 1-18 are pending.

***Specification***

3. The title of the invention is objected, because it is too long. A new title is required that is clearly indicative of the invention to which the claims are directed.

***Claim Rejections - 35 USC § 103***

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

5. Claims 1, 3-7, 9-13, 15-18 are rejected under 35 U.S.C. 103(a) as being unpatentable over Herriot (US Patent 6,154,742) hereinafter Herriot, and in view of Dujari et al. (US Patent 6,119,153) hereinafter Dujari.

6. As per independent claims 1, 7, 13, Herriot teaches a system and method for obtaining a copy of s data object. A location independent identifier associated with the desired data object is obtained (col. 2, lines 16-18). Herriot teaches the claimed, a method of constructing a system-independent key from a universal resource indicator for use in an index-less caching system (Fig. 2, col. 9, lines 28-45 and col. 12, lines 58-67).

Herriot does not explicitly teach converting URL characters to a name. However, Dujari teaches the claimed, the method comprising converting characters of the universal resource indicator to equivalent values resulting in a value string having a value string length, the value string including a file name associated with a cached resource (Fig. 2, col. 4, line 66 to col. 5, line 16). Thus, it would have been obvious to one of ordinary skill in the data processing art at the time of the invention, to have combine the teachings of the cited references because Dujari's teachings would have allowed Herriot's method so that when the local file is not found, the original URL is instead used to fetch the content from the network, whereby the content is downloaded in the normal manner (col. 2, lines 18-21).

7. As per dependent claims 3, 9, 15, Herriot teaches the claimed, the index-less caching system is a Web browser (Fig. 2, col. 9, lines 6-8).

Art Unit: 2164

8. As per dependent claims 4, 10, 16, Herriot teaches the claimed, the index-less caching system is a VoiceXML browser (col. 8, lines 42-46).

9. As per dependent claim 5, 11, 17, Herriot teaches the claimed, the equivalent values are alphanumeric values (Fig. 2, col. 9, lines 48-56).

10. As per dependent claims 6, 12, 18, Herriot teaches the claimed, the alphanumeric values are hexadecimal values (Fig. 2, col. 9, lines 48-56).

#### ***Allowable Subject Matter***

11. Claims 2, 8 and 14 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

#### ***Response to Arguments***

12. Applicant's arguments in Appeal Brief Conference Request filed on 7/24/2008 have been fully considered but are moot in the view of new ground of rejection.
